ROOF REPAIR
CONSTRUCTION SPECIALTIES

Your Second Line of Defense™
ALCO Shield Smooth

ALCO SHIELD SMOOTH Ice and Water Protector is used as a shingle underlayment on critical areas such as eaves, valleys, ridges, dormers and skylights. ALCO SHIELD SMOOTH protects roofing structures and the interior from water penetration caused by ice dams and wind driven rains.

ALCO SHIELD SMOOTH is a polymer modified asphalt membrane, fiberglass reinforced, with a smooth, skid resistant surface for installation.

MEETS:
- Miami-Dade County Approval
- Florida Building Code
- ASTM D-1970

ALCO Shield High Temperature (HT)

ALCO SHIELD HT Ice and Water Protector is designed to be used under standing seam metal roofing, metal shingles and metal roof panels. ALCO SHIELD HT protects roofing structures and the interior from water penetration caused by ice dams and wind driven rain.

ALCO SHIELD HT is a polymer modified asphalt membrane, fiberglass reinforced with a smooth, skid resistance surface.

ASTM D-1970

ALCO Shield Granular

ALCO SHIELD™ Granular Ice and Water Protector is used as a shingle underlayment on critical areas such as eaves, valleys, ridges, dormers and skylights. ALCO SHIELD Granular protects roofing structures and the interior from water penetration caused by ice dams and wind driven rains.

ALCO SHIELD Granular is a polymer modified asphalt membrane, fiberglass reinforced with a granular surface providing skid resistance during installation.

ALCO Shield 15 Synthetic Underlayment

ALCO Shield 15 Synthetic is a high-strength engineered synthetic roof underlayment that can save on labor, time, and expense when compared to standard No. 15 asphalt felt. *Patent-Pending.*

FOR USE UNDER ASPHALT SHINGLES ONLY
- 2.5 times lighter than standard No.15 felt paper (only 2 lbs. per square)
- Reinforced nail-strip speeds installation and protects against tear away
- Unique surface is engineered for durability
- Resists damage from weather exposure better than standard No. 15 felt (30 days maximum exposure)
- Reduced handling with over twice the coverage

About Reflective Coatings and Cool Roofs

A cool roof is one that has been designed to reflect more sunlight and absorb less heat than a standard roof. Cool roofs can be made of a highly reflective type of paint, a sheet covering, or highly reflective tiles or shingles. Nearly any type of building can benefit from a cool roof, but consider the climate and other factors before deciding to install one.

Just as wearing light-colored clothing can help keep you cool on a sunny day, cool roofs use solar-reflective surfaces to maintain lower roof temperatures. Standard or dark roofs can reach temperatures of 150°F or more in the summer sun. A cool roof under the same conditions could stay more than 50°F cooler.

Benefits of Cool Roofs

A cool roof can benefit a building and its occupants by:

- Reducing energy bills by decreasing air conditioning needs
- Improving indoor comfort for spaces that are not air conditioned
- Decreasing roof temperature, which may extend roof service life.

Beyond the building itself, cool roofs can also benefit the environment, especially when many buildings in a community have them.

Cool roofs can:

- Reduce local air temperatures (sometimes referred to as the urban heat island effect)
- Lower peak electricity demand, which can help prevent power outages
- Reduce power plant emissions, including carbon dioxide, sulfur dioxide, nitrous oxides, and mercury, by reducing cooling energy use in buildings

ALUMAGARD Non-Fiber Aluminum Roof Coating - 214

ALCO Alumagard Non-Fibered Aluminum Roof Coating consists of a high quality oxidized cutback asphalt and premium quality aluminum pigments which flake and float to the surface upon application. The thin consistency allows for easy application.  

ASTM D-2824, Type I

**APPROXIMATE COVERAGE** | **PACKAGING**
--- | ---
BUR 75 – 150 SF/Gallon | 4.75 Gallon Pail 36/Pallet
Metal 125 – 200 SF/Gallon | 55 Gallon Drum 4/Pallet
APP 75 – 100 SF/Gallon | 4.75 Gallon Pail 36/Pallet

ALUMAGARD Fiber Aluminum Roof Coating - 215

ALCO ALUMAGARD Fibered Aluminum Roof Coating consists of a high quality oxidized cutback asphalt, fiber fillers and premium quality aluminum pigments which flake and float to the surface upon application.

ASTM D-2824, Type I

**APPROXIMATE COVERAGE** | **PACKAGING**
--- | ---
Metal 125 – 200 SF/Gallon | 4.75 Gallon Pail 36/Pallet
APP 75 – 100 SF/Gallon | 55 Gallon Drum 4/Pallet

Aluminum Roof Coating Non-Fibered 2.5# - 214G

ALCO Aluminum Non-Fibered Roof Coating 2.5# is a blend of refined asphalt, solvents and aluminum pigments. While not as brilliant as ALCO Alumagard, it is an effective coating where premium material is not required.

ASTM D-2824, Type I

**APPROXIMATE COVERAGE** | **PACKAGING**
--- | ---
BUR 75 – 150 SF/Gallon | 4.75 Gallon Pail 36/Pallet
Metal 125 – 200 SF/Gallon | 55 Gallon Drum 4/Pallet
APP 75 – 100 SF/Gallon | 4.75 Gallon Pail 36/Pallet

Aluminum Roof Coating Fibered 2.5# - 215G

ALCO Aluminum Fibered Roof Coating 2.5# is a blend of refined asphalt, solvents and aluminum pigments. While not as brilliant as ALCO Alumagard, it is an effective coating where premium material is not required.

ASTM D-2824, Type I

**APPROXIMATE COVERAGE** | **PACKAGING**
--- | ---
BUR 75 – 150 SF/Gallon | 4.75 Gallon Pail 36/Pallet
Metal 125 – 200 SF/Gallon | 55 Gallon Drum 4/Pallet
APP 75 – 100 SF/Gallon | 4.75 Gallon Pail 36/Pallet

Aluminum Roof Coating Non-Fibered 2# - 214G2

ALCO Aluminum Non-Fibered Roof Coating 2# is a blend of refined asphalt, solvents and aluminum pigments. While not as brilliant as ALCO Alumagard, it is an effective coating where premium material is not required.

ASTM D-2824, Type I

**APPROXIMATE COVERAGE** | **PACKAGING**
--- | ---
BUR 75 – 150 SF/Gallon | 4.75 Gallon Pail 36/Pallet
Metal 125 – 200 SF/Gallon | 55 Gallon Drum 4/Pallet
APP 75 – 100 SF/Gallon | 4.75 Gallon Pail 36/Pallet

Aluminum Roof Coating Fibered 2# - 215G2

ALCO Aluminum Fibered Roof Coating 2# is a blend of refined asphalt, solvents and aluminum pigments. While not as brilliant as ALCO Alumagard, it is an effective coating where premium material is not required.

ASTM D-2824, Type I

**APPROXIMATE COVERAGE** | **PACKAGING**

About Roof Cement

Roof cement is a multi-purpose patching material and adhesive for repairing holes and leaks in roofs; fixing rust spots and joints in leaky gutters and metal trim; and stopping leaks in flashing around chimneys, valleys and coping. It also is used to glue down loose asphalt shingles and fill cracks in concrete. Roof cement is an emulsion of asphalt, refined mineral spirits, plasticizers and non-asbestos reinforcing fibers. There are formulas for dry and wet surfaces.

Plastic Roof Cement - 208

ALCO Plastic Roof Cement is made of quality refined asphalt, solvents and fillers and is ready to use from the container. It is manufactured to a heavy bodied consistency for trowel application. Dries to an extremely tough but flexible waterproofing membrane layer.

**APPROXIMATE COVERAGE**

- 1/8" Film: 12.5 SF/Gallon
- 1/4" Film: 6.25 SF/Gallon

**PACKAGING**

- 2.75 Gallon Pail: 60/Pallet
- 4.75 Gallon Pail: 36/Pallet

Wet Bond Plastic Roof Cement - 211

ALCO Wet-Bond Plastic Roof Cement is a special blend of refined cutback asphalt, a special chemical bonder and fiber fillers. It is of heavy trowel consistency and can be applied to wet or dry surfaces.

**APPROXIMATE COVERAGE**

- 1/8" Film: 12.5 SF/Gallon
- 1/4" Film: 6.25 SF/Gallon

**PACKAGING**

- .9 Gallon Can: 16/Bucket
- 2.75 Gallon Can: 60/Pallet
- 4.75 Gallon Pail: 36/Pallet

SBS Modified Bitumen Trowel Grade Adhesive - 269T

ALCO SBS Modified Bitumen Adhesive Trowel Grade is composed of a highly modified polymer roof mastic with a trowel consistency. 269T is designed to adhere SBS membrane to vertical surfaces.

**APPROXIMATE COVERAGE**

- 1/8" Film: 12.5 SF/Gallon
- 1/4" Film: 6.25 SF/Gallon

**PACKAGING**

- 4.75 Gallon Pail: 36/Pallet

ALCO 24/7 Flashing Cement is a revolutionary wet-dry flashing cement, comprised of selected blends of pure cutback asphalt, choice solvents and highly modified polymers. 24/7 is a heavy bodied product with elastomeric qualities that make it an all-purpose, durable cement for wet or dry surfaces, even under water.

The revolutionary blending of this product allows it to spread smoothly and easily in cold and hot temperatures. ALCO 24/7 has unique chemical compounds which give it great strength allowing it to cure to a tough yet flexible film.

**Advantages**

- Easy application
- Ready to use from the container
- Excellent elastic mastic with superior adhesion to SBS cold applied roofing membrane and many common roof surfaces such as BUR
- High resistance to water and weathering
- Adheres to masonry, steel and many other surfaces
- Spreads to a smooth, even consistency even in high temperatures and adheres without sagging
- Compatible with APP torch applied modified bitumen membranes
- Manufactured in two grades

**APPROXIMATE COVERAGE**

- 1/8" Film: 12.5 SF/Gallon
- 1/4" Film: 6.25 SF/Gallon

**PACKAGING**

- 11 Oz Tube: 16/Bucket
- 2.75 Gallon Can: 60/Pallet
- 4.75 Gallon Pail: 36/Pallet

Winter Grade Also Available

ASTM D-4586, Type I

ASTM D-3409
ALCO CAP Asphalt Mastic - 270

ALCO CAP Asphalt Mastic is a superior blend of asphalt, solvents and fiber fillers. The fillers in this product strengthen the liquid asphalt to form a tough but elastic surface. Once cured, it will not track in summer or crack in winter.

The coating is reinforced with mineral fibers which make it extremely tough and weather resistant. It is especially designed for the CAP System (see below). It is recommended as a base and surface coating to be used in combination with ALCO Poly-S, a stitchbond polyester. It provides an excellent re-roof system to a wide range of roof areas, while adding years of service to the life of a roof.

ASTM D-4479, Type II

ALCO CAP System

The ALCO CAP (Cold Applied Polyester) System is the most versatile system on the market today. It can be used in repairing or resurfacing old asphalt, BUR smooth surface or gravel roofs.

ALCO CAP provides a tough, elastic roofing system comparable in performance to other elastic/plastic roofing membranes, at a fraction of the cost.

The combination of a high quality mastic, and a strong flexible polyester mat adds up to a fully adhered, water tight system with no seams.

Benefits

- High Tensile Strength and Toughness
- High Breaking Strength and Elongation
- Excellent Tear Strength
- Lightweight
- Outstanding Resistance to Cold, Cracking, Rot, Chemicals and Solvents

At a later date, the addition of ALCO ALUMAGARD (the most reflective on the market) will both enhance your roof and help protect your investment.

ALCO Resurfacer Cold Process - 205

ALCO Resurfacer Cold Process Adhesive is made of quality refined cutback asphalt, fillers and bonders. It assures a rapid, tight bond similar to a blind nail or a lap cement with prepared rolled roofing.

ASTM D-4479, Type I

ALCO 269 Plus SBS Adhesive - 269

ALCO 269 Plus is formulated from choice asphalts, solvents and fillers. It is processed to a creamy smooth consistency for ease of application. This material is specifically designed as a cold process adhesive for adhering SBS modified membrane. When cured, its bonding strength becomes as tough and elastomeric as the membrane itself.

**About ALCO Products**

ALCO Products manufactures a variety of high-quality roof protection products for residential and commercial use, including a complete line of ALCO Shield™ underlayment, ALCO 24/7™ coatings, cements, and repair tapes.

Each of ALCO’s product lines are proudly built and thoroughly tested by our highly qualified staff to meet the exact needs and specifications of our industry. Our diligent efforts to provide a quality product, combined with a strong commitment to technological improvements and even greater commitment to customer service, has solidified ALCO Products as a major manufacturer in the roofing industry.

We invite you to visit our Web site for details on the wide range of professional roofing products available from ALCO Products.

---

**ALCO Warranty**

We warrant our materials to be of good quality and will replace materials found defective, providing, however, that the buyer shall examine the materials when received and promptly notify us of any defects before the materials are used or incorporated into a structure for which they are intended.
